TRANSFORMING LIVES
THROUGH

Design Intelligence

Where we've come from

Veryan was founded nearly 20 years ago as the result of a technology spin out from Imperial College, London.

Based on the pioneering work by Professor Colin Caro (Emeritus Professor of Physiological Mechanics, Dept. of Bioengineering) on the link between vessel geometry, blood flow mechanics and vascular disease, **Veryan used its understanding of swirling flow and its expertise in research and development to design, develop and patent the highly innovative three-dimensional (3D), nitinol (nickel-titanium alloy) BioMimics 3D Vascular Stent System.**

OTSUKA | OTSUKA MEDICAL DEVICES | VERYAN

big venture companies with a global outlook

NOW PART OF OTSUKA MEDICAL DEVICES

Veryan became an Otsuka Medical Devices company in 2018.

With our long track record of R&D, clinical, regulatory and commercial achievements and the support and endorsement of notable, international KOLs, **we bring real, practical, unique solutions to challenges that physicians face daily; delivering intelligent design and improved clinical outcomes.**

VERYAN + OTSUKA MEDICAL DEVICES

independently + together

ONE OTSUKA, ONE VISION, ONE GOAL

Nearly 100 years ago in Japan, the Otsuka family began to develop products that stood out from the crowd by travelling down paths of discovery where others were less likely to tread.

Ever since, Otsuka people have been passionate about developing and delivering original products as part of their global holistic commitment to better health and well-being.

This falls into three core businesses: pharmaceuticals, nutraceuticals and medical devices.

BIG VENTURE COMPANIES

Otsuka is a big venture company, one that takes risks and focuses on unmet clinical needs to develop new and better therapies.

Otsuka harnesses the extraordinary creative and innovative abilities of its people to solve problems differently and to persevere until they find answers.

Otsuka people are encouraged to follow their dreams, as turning dreams into reality is at the heart of everything in life.

A GLOBAL OUTLOOK

Otsuka established Otsuka Medical Devices in 2011 as a focused strategic company with the vision to create a game-changing approach to medical devices combining pharmaceutical expertise with intelligent design solutions.

Otsuka Medical Devices and Veryan co-operate closely with a shared culture based on ambition, innovation, calculated risk taking, and unconventional thinking.

Who we are

INDUSTRY GAMECHANGERS

To accomplish great things we need to act but also to dream, not only to plan but also to believe.

Our passion led us here. As trusted partners and valued friends we bring design intelligence – imagination, intuition and innovation, improving outcomes and enhancing lives.

OUR VISION

'We exist to improve patient care and quality of life through imagination, intuition and innovation.'

OUR PURPOSE

'Transforming lives through Design Intelligence.'

NEW IDEAS

Challenging the way things have always been done, bringing new and different ideas, seeking new solutions, shaping the future.

We aim to stand out from the crowd as real innovators, looking to nature and cutting-edge science to solve some of the most complex human healthcare issues.

Our approach

DIFFERENT BY DESIGN

Veryan offers those physicians who challenge conventional thinking, new ways of doing things, allowing them to optimise resources, delivering increased economic value for healthcare providers and enhanced quality of life for patients.

A CULTURE OF DESIGN INTELLIGENCE

Veryan has established and nurtures a culture of design intelligence – bringing to life the winning combination of imagination, intuition and innovation and delivering on it at every point of the research and product development lifecycle and throughout the customer journey. It brings new ways of organising ideas, of solving problems, giving us new ways to look at our world.

Our approach to design intelligence focuses on using our intuition and experiential perceptions to understand the key challenges and to achieve our goals.

VERYAN DESIGN INTELLIGENCE =

imagination + intuition + innovation

Veryan people

EXECUTIVE TEAM

Veryan has an industry leading Executive team with deep sector expertise, a proven track record and over 200 years' experience in Healthcare.

They bring significant core competencies in research and development and all aspects of device design and manufacture, clinical trial design and management, supply chain, sales and marketing and quality system management to the highest global industry standards.

CLINICAL ADVISORY BOARD

Veryan has the support of a number of highly qualified, industry-renowned clinical advisors, academics and physicians.

OUR PEOPLE

Veryan people are the best at what we do. We share a commitment, a passion and a vision for the contribution Veryan makes to innovation in interventional medicine.

Veryan people power Veryan's business. Whether they are design engineers, quality engineers, clinical study managers or sales specialists, our people bring an unmatched expertise in each of their fields that both inspires and challenges.

Veryan's culture of innovation helps each individual develop both professionally and personally, and our culture of respect means that we all work in a collaborative, supportive and exciting environment.

Veryan People – The Best of the Best

Where we're going

OUR FOCUS

Veryan focuses on developing innovative devices for use in peripheral interventional procedures. Our design teams between them have decades of experience developing pioneering, minimally-invasive, catheter-based technologies used by international radiologists, cardiologists and vascular surgeons.

We are specialists at intervention.

GROWTH OF OUR PRODUCT PORTFOLIO

Looking to nature and cutting-edge science, at Veryan we seek to emulate the successful development of our BioMimics 3D Vascular Stent System by extending our product portfolio helping to solve some of the most complex human healthcare issues.

These clinically proven, intelligently designed peripheral interventional devices will bring together imagination, intuition and innovation.

GOING FURTHER

When Veryan became an Otsuka Medical Devices company it opened up a world of exciting opportunities. Not only can we now have a global footprint but we can expand our Research and Development effort to create new products.

Veryan is also partnering with other innovative organisations to make design-led products available to as many people as possible.

The future is exciting.
